l'analyse du comportement

Chapter Updates

Greetings, members!

As we wrap up the summer season, we are excited to communicate with you and keep you in the loop on the initiatives of our chapter and its members.

In October of 2016 we hosted our annual AGM and had our best attendance yet! We welcomed Dr. Linda Leblanc via satellite presentation and learned about selecting appropriate data collection systems for various types of behaviour. Our membership has grown to an impressive 75 members across the 4 Atlantic provinces! This is an excellent rate of growth for such a young chapter!

Our website has been in constant growth thanks to our website committee. We have also reached the general public at a steadily increasing rate with our blog: Behaviour Bits!

We hope you enjoy this opportunity to stay up to date on our chapter's work!

Online Study Group

Back by popular demand! We will be hosting another online study group on Thursday, September 28th, 2017. Save the date and stay tuned for information on registering online for this continuing education opportunity!

Save the date: Annual General Meeting and Continuing Education

Save the date! On October 28 2017, we will host our annual general meeting and continuing education workshop. Save the date and stay tuned for registration information!

Check it out!

The William L. Heward Award was created by the Atlantic Provinces Association for Behaviour Analysis in order to increase awareness of the use of behavioural principles to promote change in human behaviours that have an impact on environmental challenges. The award will be given to a project or a study that applies concepts and principles of behaviour analysis to promote sustainable practices/environmentally friendly behaviour change. Any applied, basic or translational study with a primary goal of increasing understanding of human behaviour and environmental preservation/enhancement is eligible for consideration.
